Interview Request Form (7/1/2003)

## ATTACHMENT TO APPLICANT INITIATED INTERVIEW REQUEST FORM

Applicant would like to avert appeal and petitions in the above-identified patent application and therefore is soliciting an interview with the Patent Examiner to address the various issues raised in the final Office Action. Applicant is willing to work with the Patent Examiner to attempt to place the patent application is condition for allowance if reasonable patent coverage is afforded. In this regard, Applicant would like to discuss with the Patent Examiner the following issues:

- l. How is the election or restriction under paragraph 1 of the Office Action proper, when this restriction pertains only to dependent claims which depend on pending independent claims. Specifically, the express terms of MPEP § 821.03 and 37 CFR § 1.45 as cited by the Examiner explicitly are limited to "claims directed to an invention distinct and independent of the invention previously claimed". In this case, claims 76-78 and 80-82 are "dependent", not "independent" of the invention previously claimed as set forth in the independent claims. This in inherent by virtue of being dependent claims (the Examiner should also reference the restriction practice set forth in the MPEP which generally indicates that a generic claim precludes the issuance of a restriction requirement). Accordingly, Applicant respectfully requests the Patent Examiner's response on this issue. Applicant is hopeful that these dependent claims can be the basis for fruitful discussions since they differentiate the art and are thought to serve as the basis for a Notice of Allowance.
- 2. Regarding the § 112 issue, in paragraph 2 of the Office Action, Applicant wants to know why the illustration of FIG. 1 that shows non-intersecting trajectories is not enabling for that corresponding claim recitation (see also other figures showing the arrangement to enable substantially non-intersecting trajectories). Applicant would like to have this rejection removed or clarified for the Applicant.
- 3. Turning to the prior art rejections, Applicant is prepared to discuss amendments to the claims (as set forth in certain dependent claims and amendments previously presented) which clearly recite limitations that are not disclosed in the primary reference, O'Brien et al., and that are directly against the express teachings of that reference.

In sum, Applicant is hopeful that the prosecution can be cut short on this patent application considering the lengthy prosecution that has already occurred and in that regard is prepared to suggest claim amendments to the independent claims that Applicant believes will clearly place the application in condition for allowance. In this regard, Applicant respectfully requests a telephonic interview.
